

Dinosaur Educational Guide

Dinosaurs are an amazing educational tool to use in the classroom. The Jackson Zoo will play host to a dozen life-like, life-size dinosaurs. These not only look real but act as such as they move, make noises, and even spit.

Dinosaurs can tie into curricula on biology, history, geography, mechanics, robotics, art, and much more.

Some of our programs will be specifically designed around dinosaurs during their stay in Jackson.

Dino Classroom	\$40	Have class with one of our zoo educators in amongst our dinosaurs (weather permitting). Learn about where these dinosaurs were last seen in the world, how long ago they lived, and what their world might have looked like.
Zoo Mobile	\$85 +	Request a dinosaur to visit your school. Our baby triceratops will gladly join you as we learn about different types of animals around the world today and in pre-history.
Wild Night	\$20 per person	Spend the evening investigating our dinosaurs. Learn how they work, and see the zoo in a new light, at night!
Slumber Safari	\$40 per person	Sleep over at the zoo. Go behind the scenes with an exhibit or explore our dinosaurs in an exclusive excursion. Then right before bed meet some of our education animals who enjoy staying up all night.

Want to match something else in your lesson plans? All of our regular programming will continue while we have dinosaurs.

Wild Meet'N'Greet	\$20 per class	Join a zoo educator at one of our Mississippi exhibits to learn about our exhibit animals and have an encounter with an education animal ambassador.
Wild Classroom	\$35	Meet with a zoo educator in our education building for a live animal program aligning to the MS science standards.
